Combo-Cap

What?

The **Combo-Cap** is an amazing, innovative soda cup cap that comes with a bowl of snacks built right on top!

Perfect for anyone who's looking for a quick bite on the go instead of sitting down or looking for a table! Not to mention, great portability and a creative design that the kids will love!

Challenge

- Design a container that can be transformed into another object to create a dual-purpose container
- The container may not use glue or any other type of adhesive
