

Desk-Dock

Target Client:
ClampChamp Inc.

Product Description

The modern desk is a jungle of wires. Charger cables, headphone cords, random USBs — they all end up slipping off the desk, getting tangled, or yanking something onto the floor at the worst time. Why accept cable chaos when you can clip it into place?

Introducing **Desk-Dock** — a compact clamp-on cable hook system that mounts right to the edge of your desk. With two rounded hooks built in, Desk-Dock gives your most-used cords a dedicated “home” so they stay visible, reachable, and off the ground. No more fishing behind your desk for a cable that fell... again.

Product Features

- **Edge Clamp Mount** securely attaches to the side of most desks
- **Dual Hook Storage** holds and separates two cables to reduce tangles
- **Quick Grab Access** keeps frequently used cords within easy reach
- **Smooth Rounded Hooks** help prevent cable snagging or damage
